

## 1. SCREENSHOT OF GRIT SCORE

## 2. GIT PROFILE

- a. My goal for KodeCamp 4.0 is to become an experienced junior level DevOps engineer at the end of the training.
- b. Achieving the goal of becoming an experienced junior level DevOps engineer will enable me to become a better software engineer/ architect and have a better overview of the software development lifecycle.
- c. The obstacles I might face include time management. I will resolve the time management challenge by creating a time schedule based on priority and ensure I follow the schedule.

- d. The support systems I have in place and that I will rely on will include friends, colleagues and mentors. I will be giving them a progress update and they will act as my accountability partners.
